### 6. Background introduction

- a. This meeting was convened to further discuss revisions to the WSSO Guideline for Carbon Label Grading and Evaluation of Alcoholic Products and to align on the approach for finalizing the draft and launching the public consultation process.
- b. Yang Renjun presented detailed updates on the standard revisions, including: Definition of the functional unit for alcohol carbon labeling based on the product's sale condition, covering the product itself and all packaging components; Recommendation to use 1000 ml as the reference unit; Confirmation that the carbon footprint – based grading logic remains unchanged.

### 7. Technical Presentation(s), Contribution(s) or Discussion(s)

- a. Updates to the General Principles for Carbon Label Analysis were reported, including refinement of the comparability principle, with no major changes to scientific validity or transparency.
- b. Adjustments to grading indicators and scoring rules were discussed, focusing on data sources, error thresholds, carbon reduction rate benchmarks, and scoring logic for first-time certification.
- c. Proposed changes to carbon label design were introduced, emphasizing English-based labeling and minor layout adjustments.
- d. Issues related to data sources and accuracy were discussed, with agreement that detailed requirements will be clarified in future certification and conformity assessment documents.
- e. Participants provided comments clause by clause and discussed possible revisions in a focused and pragmatic manner.

### 8. Future business and Meetings

- a. The meeting discussed the proposed timing for the third discussion meeting of the standard.
- b. Specific details regarding the meeting schedule will be confirmed subsequently.
